RE: Letter of Recommendation
CDT Slope Repair – Vandenberg AFB
Contract# W912PL-12-D-0019/0001

Dear Mr. Flores:

It was a pleasure working with JF Engineering and your team on the CDT Slope Repair Project. As a result of your active involvement throughout the project we were able to successfully complete the soil nail and shotcrete slope stabilization wall on schedule and within budget. Workmanship was outstanding throughout the project. Whenever issues arose, JF Engineering along with your subcontractors would jointly work together to come up with innovative ideas and team based approach to constructability issues and produce a value-added no cost change, for a better final product.

There were several challenges presented during the duration of the project, however, this would never slow down the integrity of the project. JF Engineering resolved issues calmly and effectively, administrative actions were correct and error free. Job site supervision was outstanding and highly effective, always with efficient use of resources. Planning and communication was outstanding by providing schedule updates of both the 3 week lookahead schedules and overall project schedules.

Safety was never compromised. The safety plan was implemented and followed for all aspects of this construction in an outstanding manner, with no lapse of the EM 385-1-1, USACE Safety and Health Requirements Manual, throughout the project.

I enjoyed working with you as you are honest, ethical and with an old-fashioned work ethic of performing your work professionally and in a competent manner. I would highly recommend JF Engineering for future work with the US Army Corps of Engineers.

Sincerely,

A handwritten signature in blue ink that reads "Jay Hawkins".

Jay Hawkins
